“Raising Quality Of Life Through Partnership”

AN INTRODUCTION TO SVADES

SVADES is a collective endeavour that binds the industry and rural community together towards effective socio-economic development in the rural areas surrounding industry. It is indeed a unique example of unified action in the corporate sector to contribute to the progress of rural community, their development and social upliftment. SVADES is registered under the Societies Act, 1860, as a voluntary Organization set up by the giant public and private sector industries in the Nandesari Area of Vadodara Taluka, in the state of Gujarat, India. SVADES started working in 16 Panchayats with a population of around 2 lacs covering 40 villages.

OUR VISION

To improve the quality of life in villages through participation of community & industry.

OUR MISSION

SVADES aims to reduce women's drudgery by ensuring water supply and constructing approach roads. We constantly work towards improving the environmental and sanitary conditions by carrying out activities like afforestation, waste development, construction of village drains and sanitary latrines. We try our best to provide support to schools for the overall development of the students. We provide training to rural youth and women in self-employing vocations. We plan and develop pragmatic model for village planning, taking into account the process of industrialization and development. We also conduct researches in areas of community relations, social changes, wasteland development, industrial pollution and water conservation.
